

Installer: Ram Jack of Texas · Garland, TX · 972.494.3800

#### SITUATION

The Community Services Environmental Division had partnered up with outside agencies to provide Richardson residence with education and information for an environmentally friendly community. The Richardson Environmental Center is a nature preserve that is used to educate local area schools. They wanted to put in a wooden observation deck that extended over the edge of the Center's pond.

#### SOLUTION

The deck is elevated 12-feet above the bottom of the pond. Ram Jack of Texas was contracted to install helical piles and tieback anchors to support and secure the deck.
